

SurfSHIELD™ Rust Inhibitor

Volatile Corrosion Inhibitors

Volatile Corrosion Inhibitors (VCIs) (sometimes referred to as vapor corrosion inhibitors) provide excellent protection for metal surfaces and can prevent corrosion for many years. VCIs are chemicals used directly on the product that needs to be protected. They are designed to create an invisible barrier, keeping moisture at bay. VCI molecules attach themselves to metal surfaces to form an invisible, thin film only a few molecules thick.

Cascades-Sonoco Capabilities

We offer either a **water-based** or **extruded-based** VCI coated rolls for corrosion protection of both ferrous and nonferrous metals.

Cascades Sonoco	Kingsey Falls (QC, CAN)	Birmingham (AL, USA)	Tacoma (WA, USA)	Berthierville (QC, CAN)
Width	54" to 115"	40" to 98"	36" to 98"	92"
Maximum OD	72"	72"	62"	58"
Paper basis weight	60 ~800 gsm	60 ~800 gsm	60~800 gsm	65~650 gsm

Applications:

Cascades-Sonoco VCI treated paper rolls could be converted into Tubes, Wrappers, Sheets, Boxes and Bags to meet corrosion protection needs.
